Summary

I'm looking for a job as a Junior Fronted Developer.
I'm currently in Istanbul, Turkey and I'm open to remote opportunities.

I have experience in HTML/CSS, JavaScript.
I started my education at the beginning of 2021. Trained on the platforms: HTML Academy, Codebasics, Hexlet.
During the training developed:

1. Landing page dedicated to cognitive distortions where I used knowledge of HTML5 and CSS
https://cognitive-biases-hsifananab.surge.sh

2. Personal page with adaptive design
https://hsifananab-cv.surge.sh/

3. Brain Games.
Five games with CLI which let you check your mathematical abilities.
- Set up a working environment (Node.js, npm, ESLint)
- CI (Github Actions).
- Implemented a single engine that allows to add new games easily.

4. Difference calculator
Program with command-line interface (CLI) that generates a difference between two data structures or configuration files. Performs the following operations: reading files, parsing incoming data, building a tree of differences, forming the necessary output.
- Supports different input formats: json, yaml/yml.
- Generates a report in the form of plain text, stylish and json. GitHub Link:
